- Reliable
- Approachable
- Positive attitude

Languages

- Ukrainian - Native
- English - Upper Intermediate
- Polish - Intermediate

Mazurok Oleksander

Summary

I am a second-year Computer Science student at WSZIB University in Krakow. I have learned the basics of C/C++ and algorithms. I have also been teaching myself web development for three years and have spent the last 10 months in a Full-Stack Developer course, gaining strong skills in front-end and back-end development with JavaScript.

I have led three non-commercial team projects as a Team Leader. My main goal was to create good web applications quickly and help my team work well together. These projects were websites on different topics, each with a unique user experience. In addition I have one commercial project: LLC "UKRSKS" website.

Work Experience

Full-Stack Developer

ukrsk.com.ua

October 2022 - up to now | Ukraine

- Design and develop the website.
- Maintain and update the website as needed.

The task of designing, developing, and publishing a website was assigned to me. Furthermore, the responsibility for properly maintaining and administering the website, which includes the addition of provided news updates, lies with me.

Achievement: Developed a website for company and it has its own business card.

3D Artist

3D Artwork

August 2022 - August 2022 | Ukraine

I was asked to create a 3D scene from the movie "Up." The client was not happy with the first version. However, he clearly explained what he needed, and the second try was successful.

Achievement: Customer was happy.

Loader

October 2020 - October 2020 | Ukraine

I was loading tomatoes onto a truck in Kherson.

Achievement: I helped a ketchup factory gather more tomatoes than the previous year.

Projects

1. [LLC "UKRSKS" Link](#) -----[HTML, CSS, JavaScript, Node.js, NextJS, TypeScript]

This is a commercial project that features a responsive layout, and supports two languages. I was the sole developer for this project, responsible for its designing, development and publication.

2. [CanvasWizard Link](#) -----[HTML, CSS, GIT, GITHUB, React, TypeScript]

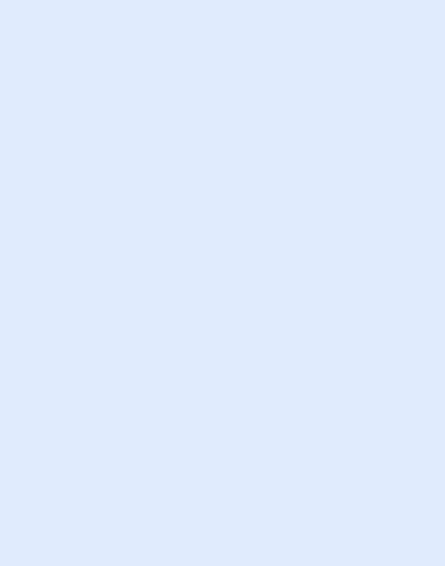

This is a website book tutorial about html element - canvas and its api and also how to make projects on it.

3. [Bookshelf Link](#) -----[HTML, CSS, JavaScript, GIT, GITHUB]

This project provides you with a variety of books. There, you can observe and add them to your wishlist for buying. There are lots of categories of books so you will find what you need.

The command project involves developing a bookshelf website for buying books using a REST API. In this project I was a TeamLeader

4. [ImageHub Link](#) -----[HTML, CSS, JavaScript, GIT, GITHUB, API, REST API, Parcel]

The ImageHub is an application which provides you with a search bar and your imagination to search images with <https://pixabay.com/> API.

5. [ToDo Link](#) -----[HTML, CSS, JavaScript, GIT, GITHUB, jQuery]

The ToDo web application features a main list of general topics, and each topic contains its own list of todos. You can manage these lists as you wish: add new topics, add todos to each topic, remove items, and mark them as completed.

Additional Education

Go IT (Full-Stack Developer)

September 2022 - October 2023 | Ukraine

School of Management and Banking, WSZIB (Computer Science)

October 2023 - up to now | Poland / Krakow
